# Equivalent Fractions Worksheet 1
Mathforall.net

Name _____   Date: _____

To create equivalent fractions, we may _____ or _____ across numerator and denominator.

Write the equivalent fractions and write what we multiply by to go from first to second fraction:

Write the missing number:

$$\frac{3}{8} = \frac{}{48} \qquad \frac{45}{63} = \frac{5}{} \qquad \frac{}{5} = \frac{21}{35} \qquad \frac{18}{} = \frac{3}{7}$$

Reduce (if you can!):

$$\frac{12}{20} = \text{—} \qquad \frac{40}{64} = \text{—} \qquad \frac{50}{100} = \text{—} \qquad \frac{14}{25} = \text{—}$$
